

American Orchid Society Judging

SHEET for BOTANICAL RECOGNITION

Awarded to previously unawarded species or natural hybrids deemed worthy of recognition because of rarity, novelty and educational value. No award of any kind may have been previously made to the species as a taxon. No point score is used but the award shall be granted only by the affirmative vote of at least two-thirds of the judging team assigned.

Place San Marino Date 4/8/23 Entry No. 18

Plant and clonal epithet Scapias vomeracea

RECOGNIZED FOR:

Unusual spacing, coloring, of form of flower. Sheath almost noticable than the flower. ^{on spike}
